

AI That Helps You Master Knowledge

JAIDE transforms how your organization accesses and uses its knowledge. Instead of employees spending hours hunting through documents, JAIDE delivers precise answers in seconds. Unlike generic chat solutions that require perfect prompting skills, JAIDE understands your business context and guides users to reliable, traceable results. “Made in Germany” with complete data sovereignty, JAIDE offers enterprise-grade AI without vendor lock-in or cloud dependency.

Your knowledge problem is costing you millions

Your company’s most valuable asset—institutional knowledge—has become your biggest operational challenge. As information volumes explode, your ability to find what matters shrinks dramatically.

The brutal math:

82% of enterprises struggle with fragmented data across disconnected systems. The cost? Your knowledge workers waste up to **40% of their time** searching instead of creating value. That’s nearly two full days per week, per employee.

Why current AI tools fall short:

First-generation AI promised to solve this. Instead, they created new problems:

- **Generic chatbots require AI expertise** that most employees lack. Poor prompts yield poor results, leading to user abandonment.
- **Siloed solutions** can’t access your integrated business systems, leaving critical knowledge trapped.
- **Complex rollouts** take months while technology becomes obsolete, delaying ROI indefinitely.

The competitive cost of inaction:

While your teams search, competitors act. Customer responses slow. Innovation stalls.

The question isn’t whether you need intelligent knowledge management—it’s how fast you can deploy it profitably.

JAIDE – your AI knowledge partner that actually works

JAIDE isn't another chat solution promising everything and delivering confusion. It's your organization's purpose-built knowledge assistant, engineered in Germany and tailored to your specific business processes.

What sets JAIDE apart?

- **Beyond simple chat:** JAIDE doesn't just retrieve information; it processes and applies your knowledge. From answering complex questions to drafting analysis reports, JAIDE works with domain-specific, fine-tuned models that understand your industry language and context.
- **Transparent, trustworthy results:** Every answer comes with complete source tracing. JAIDE highlights relevant document sections, provides clear citations, and shows its reasoning. No black boxes, no hallucinations you can't verify.
- **Guided workflows, not guesswork:** JAIDE understands context and leads users through intelligent conversations using specialized AI agents. No prompt engineering required, the system knows what you need and how to get there.

How it works

The screenshot displays the JAIDE Document Analysis interface. At the top, a progress bar shows three steps: 1. Document sources, 2. Task (current step), and 3. Result. The 'Task' step is expanded, showing a 'Define task' section. Under 'Task', there are three main sections: 'Summary', 'Table of contents', and 'Extraction'. The 'Summary' section includes a 'Focus theme (optional)' field, a 'Style of speech' dropdown set to 'Formal', and a 'Length of summary' dropdown set to 'Average'. The 'Table of contents' section has two radio buttons: 'by documents' and 'by content/chapters' (which is selected). The 'Extraction' section is currently empty. At the bottom of the task configuration, there is a blue 'Start analysis' button and a 'Back' link. The left sidebar contains navigation options: Chat, Document analysis, Research, Source management, and a History section with a search history and a list of recent analyses.

Conversational intelligence

- ▶ Natural dialogue for quick queries with full source attribution
- ▶ Specialized AI agents handle complex, domain-specific tasks

Document analysis

- ▶ Instant summaries
- ▶ Precision data extraction with visual document highlighting
- ▶ Smart tables of contents

Intelligent research

- ▶ Simultaneous search across all knowledge sources
- ▶ Consolidated answers instead of hit lists
- ▶ Transparent source references

Your benefits at a glance

► **Made in Germany – 100% data control**

Your sensitive data never leaves your chosen environment: private cloud, on-premises, or hybrid deployment. Built to exceed GDPR requirements from day one.

► **Future-ready architecture**

New AI models emerge constantly. JAIDE's model-agnostic design integrates tomorrow's breakthroughs without system replacement. No vendor lock-in.

► **Business process integration**

JAIDE adapts to your workflows, not the other way around. Industry-specific customization means faster adoption and measurable ROI.

► **Built on quality data**

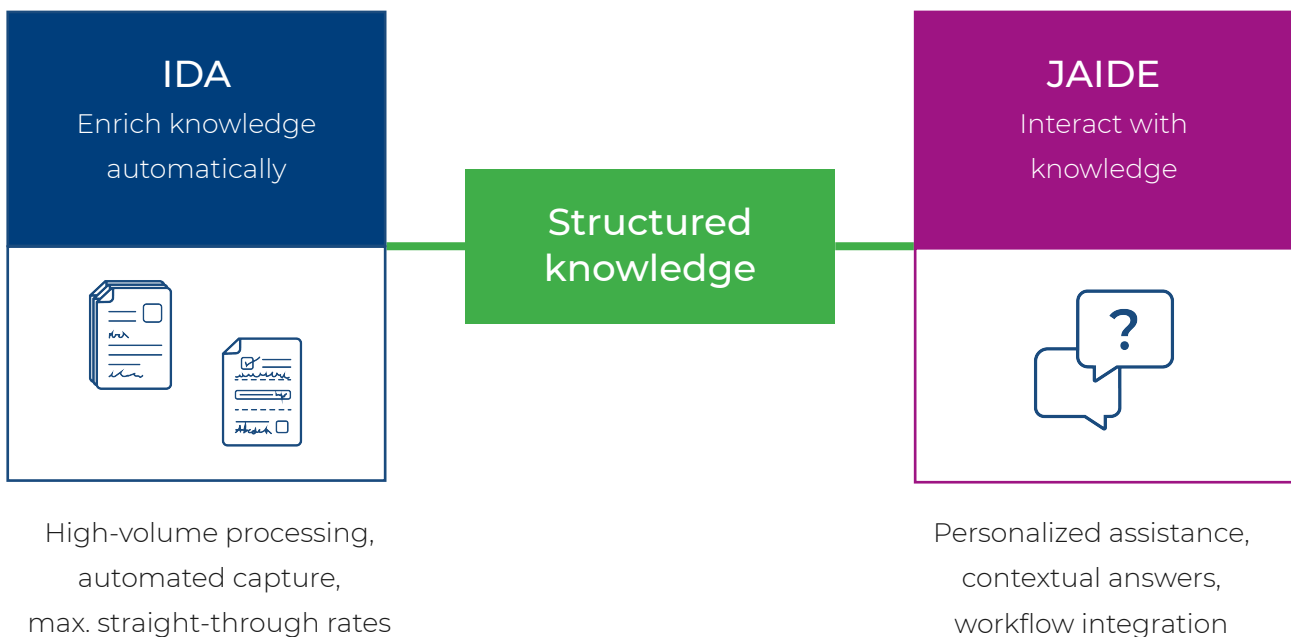

Seamless integration with PLANET AI's IDA solution ensures clean, structured data input. No "garbage in, garbage out".

► **Granular access control**

Define precisely which teams access which AI capabilities. Role-based permissions with full administrative oversight.

JAIDE and IDA – the complete solution

While **IDA** converts your document volumes into structured data at scale, **JAIDE** makes that knowledge instantly accessible to every user:

Together, they create an end-to-end knowledge pipeline: **IDA** digitizes, **JAIDE** democratizes.

Results across industries

JAIDE as a service assistant in manufacturing

Technical teams access 30+ years of service documentation instantly.

JAIDE in tender management of an IT service provider

Automated requirement extraction from RFPs with intelligent Q&A for reduced proposal development.

JAIDE assisting in public administration

AI-powered document templates and automatic case file analysis to optimize citizen services.

Your next steps

Proof of value

- Start small with 1-2 high-impact use cases
- Demonstrate value with your actual documents and workflows
- Expand systematically based on proven results

Stop searching, start succeeding.

Every minute your team spends searching is a minute not spent creating value for your customers.

As a software manufacturer, PLANET AI is a pioneer in AI-powered document process automation. Core products include IDA for intelligent document processing and JAIDE for AI-supported knowledge assistance. Together, they deliver end-to-end data quality from capture through utilization. PLANET AI has been part of Bechtle AG's portfolio since 2023 and addresses scanning service providers, software manufacturers, and document-intensive industries such as insurance, banking, and the public sector. Founded in Rostock in 2015, the 60-person team combines proprietary innovation with proven enterprise technologies, maintaining strict European data protection standards across all deployment.
